

## Doctorate Registrations in Toulouse : tutorial for Directors of Thesis

The Doctorate is a national degree supervised by a **decree from May 25th of 2016, setting the national frame of Education and the terms allowing the national degree delivery**. Doctorate's registration must be done according to some precise rules : access modalities, scientific hosting, doctoral training, etc. This decree is extremely important because it sets the legal terms of the doctorate and give precious information on how to carry out the thesis, its oral presentation, the rights and duties of the doctoral student, international co-tutorship, duties of the different actors of the doctorate etc.

<https://www.legifrance.gouv.fr/affichTexte.do?cidTexte=JORFTEXT000032587086>

The 25th of May of 2016 decree settled that “the registration in year one of PhD is agreed by the headmaster based on a proposition by the head of doctoral school, after opinion of the thesis director and unit director or the research team about the quality of the project and the terms of its achievement”. That's why this procedure of registration and re-registration is particularly complex and long compared to other academic registration such as Licence and Master. This is why this procedure is much more long and complex than other academic registrations such as Licence and Master.

Thus, the doctoral student is linked to a Doctoral School (ED), a research unit (research lab) and higher education institution allowed to accredit the national diploma of PhD. The doctoral student is linked twice: scientifically to a ED and a research lab, and administratively to an institution.

The registrations and re-registrations requests are all dematerialised on the platform ADUM, each actor of the registration chain give its opinion on the doctorate's student request on this platform

#### Summary of the thesis project in French

Ma pratique en tant que psychologue / psychothérapeute en libéral auprès d'une majorité d'enfant entre 3 et 11 ans m'amène à réinterroger la place du lexique dans la gestion des émotions. En effet, il se dégagerait une hypothèse de tout ça : plus large serait l'étendue du champ lexical des enfants et

#### Summary of the thesis project in English

My practice as a liberal psychologist /psychotherapist with a majority of children between the age of 3 and 11 leads me to re-examine the place of the lexicon in the management of emotions. Indeed, there would be a hypothesis of all this: the wider the scope of the lexical field of children and the better their ability to
